# About this report

PRI reporting is the largest global reporting project on responsible investment.

It was developed with investors, for investors. PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders. This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2025 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

## Disclaimers

### Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

### Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

### Data accuracy

This document presents information reported directly by signatories in the 2025 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

## SENIOR LEADERSHIP STATEMENT

### SENIOR LEADERSHIP STATEMENT

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SLS 1	CORE	N/A	N/A	PUBLIC	Senior Leadership Statement	GENERAL

#### Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

DELA is a Cooperative that focuses on providing security, care and continuity. That is why we always have an eye for the long term and therefore sustainability. We not only believe in a worthy farewell for everyone, but above all that we are there for each other. This connection implies that we also demonstrate our social commitment through our investments. Of course we try to achieve the best possible return with our investments, but we also pay attention to the social changes that we can bring about with our investments. We also believe that returns and sustainability go hand in hand: companies that pay attention to sustainability in their policy and management are often more stable and financially healthy companies with a greater eye for risks.

We also believe that ESG insights enriches the investment process and helps select tomorrow's winners and avoid tomorrow's losers. DELA will focus on the environment and climate in the coming years, without losing sight of the other aspects of Socially Responsible Investing. With this, DELA wants to contribute to achieving climate and other sustainability goals. Not only by making our own portfolio more sustainable, but also by supporting market-wide initiatives. The first is necessary, but not enough. By joining forces and supporting sustainability initiatives, we steer at a higher level towards a more sustainable economy and a more liveable world for us, our children and our grandchildren.

We've made a commitment to sustainable healthcare real estate which is in line with what DELA and our Cooperation stands for. Furthermore we are expanding our sustainable farm- and timberland portfolio to make some real world impact. We've also included a sustainable energy fund in our infrastructure portfolio. Our portfolio managers of the illiquid portfolio engage with the respective fund managers to make sure ESG is a high priority in all our funds. In our liquid portfolio we're working with exclusions and engagement. Overall we've made the commitment to be net zero in 2050.

#### Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
  - refinement of ESG analysis and incorporation
  - stewardship activities with investees and/or with policymakers
  - collaborative engagements
  - attainment of responsible investment certifications and/or awards

Last year has mostly been focused on preparations to be compliant for CSRD.

### Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We are continuously searching for possibilities to enhance our ESG policy. Among others we will:

- Stimulate sustainable investing in our active mandates
- Investigate the possibilities to invest in solutions: impact investing
- Incorporating ESG data into our own monitoring and using it to challenge managers.

### Section 4. Endorsement

Elaborate:

DELA is a cooperative that focuses on providing security, care and continuity. That is why we always have an eye for the long term and therefore for sustainability. We not only believe in a dignified farewell for everyone, but above all that we are there for each other. This connection implies that we also demonstrate our social involvement with our investments. Of course we try to achieve the best possible return with our investments, but we also pay attention to the social changes that we can achieve with our investments. We also believe that returns and sustainability go hand in hand: companies that pay attention to sustainability in their policy and management are often more stable and financially sound companies with a greater eye for risks. We also believe that ESG insights enrich the investment process and help to select tomorrow's winners and avoid tomorrow's losers. Responsible investing fits DELA's philosophy because we have an intrinsic drive to make a positive contribution to our society and the world. DELA not only wants to meet social standards in terms of current views, but also in terms of the views of future generations who will look back at the present day.

While our engagement service provider, Columbia Threadneedle Investments, generally prefers to engage issuers in private to enable honest, open, and frank discussions to take place, collaboration with other investors or stakeholders might be an impactful engagement or escalation strategy. Given ownership of an issuer is often dispersed, for a stakeholder’s voice to have weight it may require collaborative engagement to address issues effectively at the issuer or industry level. Columbia Threadneedle Investments supports dialogue amongst investors and collaborative engagement on a case by case basis where this contributes to the creation and protection of stakeholder value.

**How does your organisation ensure vote confirmation, i.e. that your votes have been cast and counted correctly?**

The sustainability research, corporate governance and proxy voting analysts at Columbia Threadneedle Investments are responsible for the execution of global proxy voting on behalf of reo® clients. Columbia Threadneedle Investments has a number of established controls to ensure voting is conducted in a timely manner through the daily review of the voting queue and a 4 eyes check which reviews execution is being done correctly in advance of all vote deadlines. Another control looks at a daily report which identifies votes that are not consistent with the established policy and a review is conducted to ensure the correct analysis has been completed. The Proxy Voting Team, conducts these voting controls to ensure the process and policies are followed routinely. Any exceptions in voting – which are inconsistent with the established policy - are escalated to the Proxy Voting team. A review is then conducted by dedicated corporate governance team members with feedback from other resources at Columbia Threadneedle Investments, and any exceptions to the policy are decided as necessary. The votes outside of the established policy are then completed by the Proxy Voting team. There are routine reports which are generated by the proxy voting service provider (ISS) which are reviewed by the Proxy Voting Team to monitor votes are being counted and successfully submitted.

- (A) Yes, within our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

We have identified climate-risk in general and included in our RI policy that we want to act in line with the Paris agreement and the Dutch klimaatakkoord. In 2024 we analysed the impact of climate scenario's in our ALM-study. We actively reduced the carbon intensity in our passive equity portfolio's by 50% and excluding coal, oil sands, arctic drilling and shale energy. Our real assets portfolio do have a direct exposure to physical climate risk such as higher sea levels. We have already invested significantly in a renewable energy fund and green bonds. In 2021 we started adding sustainable farmland managers to our real assets portfolio, and in 2023 we committed to a sustainable timberland fund in which we started investing in 2024.
